DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 18-19, 25-29, 37-38, 40, 42, 44 and 46-51 are rejected under 35 U.S.C. 102(b) as being anticipated by Furusawa et al (US 5,819,410).

Furusawa discloses in spring contacts attached to 30 to a plurality of rigid, conductive recesses 20a and 41 within a substrate 20; 2 is pressed to make contacts between 2as and 32 and moving 2 just below the top surface of 20 removes electrical connections; 10 is a semiconductor device; 2 is a second electronic device; 33, 43 and 12a (bottom) are conductive; and 2 is a semiconductor chip.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 20-24, 30-36, 39, 41, 43 and 45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Furusawa et al (US 5,819,410) in view of Murphy (US 5,038,467), Feldberg (US 4,533,199) and Murakami (US 6,449,838).

Art Unit: 3729

Furusawa fails to disclose cone shaped, concave shaped, V-shaped, U-shaped, trapezoidal shaped, wider at the entrance recess, tapered inwardly recess, a metallic plating disposed on a surface of the cavity, and a plated bottom portion.

Murphy discloses a cone shaped (see last Office Action).

Feldberg and Murakami disclose U- (Fig. 1) or trapezoidal (1 17) shaped recesses, respectively. Further, Murakami discloses plating 103.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Furusawa by providing cone shaped, concave shaped, V-shaped, U-shaped, trapezoidal shaped, wider at the entrance recess, tapered inwardly recess, a metallic plating disposed on a surface of the cavity, and a plated bottom portion, as taught by Murphy/Feldberg/Murakami, for the purpose of better coupling with the substrate and providing fine conductors on and in the recesses.

Response to Arguments

5. Applicant's arguments filed have been fully considered but they are not persuasive.

33, 43 and 12a (bottom) are conductive and 2 is a semiconductor chip.

Interviews After Final

6. Applicant note that an interview after a final rejection must be submitted briefly in writing the intended purpose and content of the interview (the agenda of the interview must be in writing). Upon review of the agenda, the Examiner may grant the interview if the examiner is convinced that disposal or clarification for appeal may be accomplished with only nominal further consideration. Interviews merely to restate arguments of record or to discuss new limitations will be denied. See MPEP 714.13 and 713.09.

Conclusion

7. Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity (optional). Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
